

RALLY TRAUMA KITS

In a continued effort to strengthen rally safety, we are excited to announce the addition of the Rally Trauma Kit as an additional resource being provided to our competitors at no charge.

The Rally Trauma Kit can provide immediate lifesaving trauma care while EMS is en route.

These kits will initially be made available at each remaining 2024 National event. It will be provided on loan for the event and can be checked out during Scrutineering and returned with the RallySafe unit for those that want to carry one.

While the contents are a necessary tool, the training to use them properly is equally important and highly encouraged. The link to the FREE online course is [HERE](#)

Participation in the program is optional. Usage of the contents will not incur a fee.
